

Computational Linguistics (CL3.101)

Summer 2021, IIIT Hyderabad

05 July, Monday (Lecture 17) – Basics of Syntax

Taught by Prof. Radhika Mamidi

Basics of Syntax

Syntax describes how words are put together into meaningful combinations.

Chomsky initiated the idea of generative grammar – an algorithm for generating all and only the grammatical sentences in a language.

Chunks

Chunks are constituents of sentences that participate in rules.
