

# **Computational Linguistics (CL3.101)**

**Summer 2021, IIIT Hyderabad**

**30 June, Wednesday (Lecture 16) – Morph Analysis 8**

Taught by Prof. Radhika Mamidi

## **FST-based Morphological Analysers (contd.)**

An FST is an FSA which has an output as well as an input marked on each arc, and which therefore generates an output token for each input token that it accepts.
