Computational Linguistics (CL3.101)

Summer 2021, IIIT Hyderabad

08 June, Tuesday (Lecture 7)

Taught by Prof. Radhika Mamidi

Homonymy

The same word can have different parts of speech, with different meanings: *sona* in Hindi, *ceppu* in Telugu, etc.

Part-Of-Speech Tagging

It is an important step to disambiguate words with more meanings than one.

Supervised taggers typically rely on pre-tagged corpora to servea s the basis for creating any tools to be used throughout the tagging process.

Rule-based approaches use context to determine tags.
